Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 5, 7, 8 and 10-15 are again rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Hata et al. for the reasons of record.

Claims 5, 8 and 11-15 are again rejected under 35 U.S.C. 103(a) as being unpatentable over either of the patents to Ishida et al. for the reasons of record.

Claims 7 and 10 are again rejected under 35 U.S.C. 103(a) as being unpatentable over either of the patents to Ishida et al. in view of the patent to Hata et al. for the reasons of record.

It is first noted that applicants' arguments are directed to a parameter (i.e., the acrylic polymer/silica ratio) that is not recited in the claims. Furthermore, since Comparisons 3' and 3'' fail to correct the problem (i.e., that the type of silica is not the only variable in Example 1 and Comparative Example 3) noted in the last Office action, the newly submitted 132 Declaration is not dispositive of the issue of patentability.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
